 - California #C36833
 - Texas # 30915
- Leadership in Energy and Environmental Design (LEED) Accredited Professional since 2/04/2004, BD+C specialty
- Member - American College of Healthcare Architects

Max is a licensed and board-certified healthcare architect with over 20 years of experience delivering facilities for IHS, Tribal, VA, and private healthcare clients. His work has included projects funded and administered through federal processes, with direct familiarity with IHS and Title V requirements, stakeholder coordination, and compliance-driven documentation.

He has led projects through all phases—from master planning and programming through construction and final inspection- providing a practical understanding of how Program of Requirements documents, budgets, and schedules translate into built outcomes. This perspective is directly relevant to the Owner’s Representative role, where maintaining alignment between scope, funding, design intent, and execution is critical.

He is known for disciplined oversight, technical rigor, and consistent follow-through, contributing to projects that require coordination among multiple stakeholders, consultants, and regulators.
